

LETTER OF RECOMMENDATION

Date: 30-10-2025

To Whom It May Concern,

I am pleased to write this letter of recommendation for LIKITHA SRI MADDIPATLA, a third-year undergraduate student in Computer Science and Engineering at Sir C.R. Reddy College of Engineering. Over the past year, I have had the opportunity to observe Likitha's academic growth, technical depth, and emerging research interests, and I can confidently say she is one of the most promising students I have mentored.

Likitha brings a rare combination of analytical precision and creative problem-solving to her work. She is highly proficient in Python, SQL and machine learning frameworks, and consistently demonstrates a strong grasp of algorithmic logic and data-driven thinking. Her ability to debug complex scenarios and communicate solutions with clarity reflects both technical maturity and intellectual discipline.

What sets Likitha apart is her vision. She has expressed a clear and compelling desire to begin her research journey at the intersection of artificial intelligence and healthcare, with a focus on solving real-world problems, such as predicting cancer and hearing loss at an early stage. This ambition is matched by her curiosity, resilience, and ethical awareness in adapting technology for social good.

In team settings, Likitha is a thoughtful collaborator and often takes initiative in organising tasks, synthesising feedback, and driving projects forward. Her academic record reflects consistent performance, and her engagement in competitive programming and model-building exercises shows a strong commitment to continuous learning.

Likitha sri stands out as one of the strongest undergraduate students I have encountered, excelling not only in academic achievement (CGPA: 8.5/10) but also in curiosity, perseverance, and integrity. I am confident that she will make a substantial contribution to any research or professional environment, particularly in data science, AI, or software engineering.

I strongly recommend Likitha sri Maddipatla for your research internship or program, and am certain that she will exceed expectations and represent Sir C.R. Reddy College of Engineering with distinction.

If you require any further information, please feel free to contact me at samparthinitj@gmail.com

Sincerely,

SAMPARTHI V S KUMAR

Assistant Professor

Sir C.R. Reddy College of Engineering
